Experimental Situation Report

Fire Weather Concerns Thursday and Friday

Spotter Activation

Not Necessary

Mild through the Weekend

Published on: 02/15/2017 at 3:41AM

Overview

Warm and dry conditions will develop Thursday and Friday. Humidity values will fall into the 20-30% range both days with southwest winds Thursday and south-southwest winds Friday. Wind speeds will not be very strong, but these values will still bring the Rangeland Fire Danger Index into the Very High category for much of the area both days. See the Fire Weather pages below for more information.
